Hi, I have problem with my macbook air(I think i will look like the headphone jack doesn't works). I have a Macbook air and I'm using Yosemite version 10.10.2(i don't know whether I have to download it from my macbook air or I will get the update at my macbook). I have no idea what to do, I'm so confused, please help me. I have a friends MacBook and she's having problems with her battery. It shows about 6% remaining, but the laptop

battery won't tell her anything else. I checked her battery and it seems fine to me. Does anybody know how to do this? Hi! Is it possible to make these gestures: swiping to right/left and swiping to top/bottom? On the first trackpad I have a trackpad which swipes left/right, but on the second I have the standard trackpad. I want to do that on the second trackpad as well. Hi! I want to use my 3rd trackpad (the one I use to move my mouse around) to open the taskbar on the 2nd screen. I do this by using Cmd+F12 and then using the mouse to click on the top-left icon. This works fine with the 2nd trackpad but with the 3rd one I have to move the mouse up until the taskbar comes up. Is there a way to do this and also make it so that it opens on the right instead of the left? A:How to Use 3rd Trackpad to Move the Mouse Use the trackpad in place of the mouse. Press and hold the option key as the computer boots. When you get the Login window, press the option key. Log in. Press the option key again. Click the Desktop folder. Click the icon to install the Trackpad gestures. Click OK. To start using the gestures, double-click the icon on your desktop. To move a window, simply click the icon in the corner. It will open the window, and you can click it again to close it. Catherine A. If it's got a trackpad, you can control 82157476af
